PROJECTS

Calender Planner

Mar 2024 - Mar 2024

<https://planner-app-khaki.vercel.app/>

I specialize in developing comprehensive calendar planner applications that empower users to efficiently manage their daily and monthly tasks while seamlessly integrating event marking and journaling functionalities. With a keen focus on user experience and functionality, my solutions ensure intuitive navigation and smooth interaction. Additionally, I incorporate features such as voice memo integration to enhance usability and productivity. I am confident that my expertise in frontend development, coupled with my commitment to delivering high-quality solutions, will be valuable assets to your project.

My portfolio

Feb 2024 - Feb 2024

<https://leorasaharia.vercel.app/>

I am a first-year undergraduate student at the National Institute of Technology Raipur, majoring in Biomedical Engineering. My schooling was completed at Delhi Public School Bhilai. Originally from Bhilai, Chhattisgarh, my roots trace back to the picturesque city of Guwahati, Assam.

In terms of experience, I am deeply passionate about coding contests and have led projects, notably contributing to the development of a cutting-edge "Healthbot" website. My expertise primarily lies in frontend development, complemented by proficiency in languages like C, C++, and Python. Additionally, I am intrigued by the prospect of becoming a full-stack developer.

Beyond coding, I have a keen interest in music making and production. In my free time, I run a YouTube channel where I indulge in singing. I also find joy in writing journals and am currently working on a novella that explores love in its myriad forms.

ADDITIONAL DETAILS

In 2021, during 11th grade, I secured 1st runner-up in a national essay contest by Experience Japan, exploring "Language as Cultural Reflection." Representing DPS Bhilai, I showcased adept language skills and critical analysis.
